Survey Summary

The global means and the –medians- for graduate students courses are:

Overall, how would you rate this course?

Graduate: 4.15 -4.00-

Overall, how would you rate the instructor?

Graduate: 4.35 -5.00-

Evaluate Questions as follows: Mark the option you feel most appropriately describes the course / instructor

- N/A - Question not applicable or don't know
- 1 - One of the least effective, very low
- 5 - Outstanding, one of the few, extremely high

Competency Statistics Value

Comments to the instructor of this course

Comment

Really enjoyed the class and learning experience. It was interesting to understand the economical and financial impacts on a larger level. Glad we stayed high level with some of the quant heavy topics. This course made me want to be an economist.

Lectures are basically well-organized.

Probably my favorite class this quarter. When you mix an interesting subject with a lot of real-world applications, and a professor with a sense of humor and tons of anecdotes in economic history to tell, then this is a great course. I would keep everything in this course the same, except for maybe the "investment strategy" paper. Not sure what the paper's value was here. Our team spent more time deciding what to write than actually developing the content. I think a better format would be a debate between Monetarists and Keynesian economists.

Prof. Christian Dippel is the most insightful and knowledgeable prof I have ever met at UCLA, and I learnt a lot in his class. I recommended his class to all of my peers in public policy program.

Great course, excellent learning experience. Great use of current events to teach macroeconomic topics.

Too much work backloaded

I really enjoyed this class and think that Prof. Dippel is a great professor.

I think at times the class was a bit slow-moving - maybe I am wrong about that.

Greater focus on current topics in global macroeconomics would be a nice addition. For example, during the Fall Quarter 2014, the economic situation in Japan, Europe and the US is highly topical - it would be good to have some kind of recap every week on the key themes that have been occurring. Maybe this should be a requirement of students each week - to discuss what has been happening in global macroeconomics? One of my favorite classes I have taken at Anderson. However, that is possibly because I am a huge Macro nerd.

Excellent class and excellent instructor! one of the best classes I had @ Anderson. You should consider making it a core class. I have learned so much and it feels like a must have knowledge for an MBA. I highly recommended to my classmates.

Excellent course, although more opportunities to practice IS-LM model would have been beneficial, I think

The pace of the class was relatively high and I had to learn a lot of concepts prior to every class because I do not have the background of economics. But this greatly helped me increase my understanding rapidly.

The course was a great balance of technical background and real life application. I enjoyed the course materials (weekly materials) and was happy with the light workload while trying to complete GAP simultaneously. It seems the two assignments at the end of the course are tacked on in order to grade something. Not sure if they are entirely worthwhile. Overall, I think this is a great elective and Professor Dippel did a great job instructing & managing the classroom.

I took Dippel for my intro Micro Economics and I have seen a huge improvement from that course to this course. He is much more organized in his presentation & his thought process. I think this course was amazing and I learned a lot from it. I suggest it to all my friends

May very well be my favorite class at Anderson, so far, as well as my favorite professor. His teaching seems almost effortless, but is clearly well planned/thought out. He is so knowledgeable about the subject that he handles discussions and difficult topics with ease. Always finds the best angle by which to teach us difficult concepts, even if it's not the first angle tried.

very knowledgeable and approachable professor. Interesting and well-organized slides. Good class environment.
